-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4-7 and 13 are objected to because of the following informalities:  
the preamble of these claims are not consistent with claim 3. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The shaft lacks antecedent basis.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

5. Claims 3-5 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Pizzo, US Patent 6,019,478. An electronic equipment comprising an operation tool 10 to be mounted on a support member; wherein said operation tool includes an operation portion to be operated by an operator; a mounting portion 38 formed spaced apart from the operation portion in a direction where an impact is applied to the operation tool, the mounting portion being arranged to be mounted on the support member; and a crashable connecting portion 36 for connecting together the operation portion and the mounting portion (36 is capable of being crushed in the claim manner because it is thinner than both the knob portion of 10 and the mounting portion 38); the crashable connecting portion being adapted to be crashed upon an impact force exerted on the operation portion such that when the crashable connecting portion is crashed, the operation portion will move with respect to the mounting portion. The crashable connecting portion radially extends from the mounting portion to the operation portion. The crashable connecting portion includes plural bridge portions 36 radially extending between the mounting portion and the operation portion so as to connect together said mounting portion and said operation portion. Each of the bridge portions has a cross section of which the thickness in a direction along the shaft is smaller than the width thereof in a direction perpendicular to the shaft (this is clear from the figures). A portion

of the crashable connecting portion is bent along a length of the crashable connecting portion (see figure 3). The mounting portion will not move upon impact, as claimed.

***Allowable Subject Matter***

6. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

7. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

This action is non-final.
